Team ID	6ab2a721eb88f5d3d45a509b
Project Title	S Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	To revolutionize student enrollment and course management using Salesforce automation, ensuring faster, accurate, and centralized academic operations.
Scope	Covers the complete enrollment lifecycle—student registration, course selection, fee payment, approval, instructor assignment, and reporting—within a unified Salesforce environment.
Problem Statement	
Description	Current enrollment processes are manual, fragmented, and error-prone. Data is scattered across spreadsheets and emails, reporting is delayed, and systems are unintegrated.
Impact	Solving these issues will reduce duplicate entries, speed up approvals, improve data accuracy, and enhance student and administrative satisfaction
Proposed Solution	
Approach	Employ Salesforce-native tools—Flows, Approval Processes, Validation Rules, Reports, and Dashboards—to build a scalable, automated enrollment system.
Key Features	Centralized Salesforce-based enrollment system with custom objects (Student, Course, Instructor, Enrollment). • Automated approval workflows and validation rules. • Auto-assignment of instructors based on course category. • Real-time reports and dashboards for enrollment tracking and revenue monitoring. • Role-based security and sharing rules.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
	Computing Resources	Cloud-based Salesforce platform (no on-premise hardware required)
	Memory	N/A (Salesforce Lightning runs on browser)
	Storage	Salesforce Developer Org (standard data storage limits)
Software		
Frameworks	Frameworks	Salesforce Lightning Experience
Libraries	Libraries	Salesforce Flows, Approval Processes, Validation Rules, Reports & Dashboards
Development Environment	Development Environment	Salesforce Developer Org, Lightning App Builder, Object Manager, Flow Builder
Data		
Data	Data Source, Size, Format	Salesforce custom objects (Student__c, Course__c, Instructor__c, Enrollment__c), CSV import templates
