

No. of Functional Features Included in the Solution

Date	29 September 2026
Team ID	6ab2a721eb88f5d3d45a509b
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Functional Features Overview:

The Student Enrollment & Course Management System (SECMS) provides a set of functional features to manage students, courses, instructors, and enrollments. The system also includes automation, approval processes, reporting, dashboards, and security features to streamline academic enrollment operations.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Student Management	Allows administrators and enrollment officers to create and manage student records including personal details, contact information, and student status.	Student Management	Done	0.5
2	Course Management	Allows administrators to create and manage course details such as course name, category, duration, course fee, and description.	Course Management	Done	0.5
3	Enrollment Management	Allows users to create and manage enrollment requests by linking students, courses, instructors, enrollment dates, fees, and status.	Enrollment Management	Done	0.75
4	Instructor Assignment	Automatically assigns an instructor based on the selected course category using Salesforce Flow.	Instructor Management / Flow	Done	0.5
5	Validation & Approval	Validates student and enrollment information and routes enrollment requests for approval before confirmation.	Validation Rules / Approval Process	Done	0.75
6	Automated Notifications & Tasks	Sends notifications after enrollment approval and creates follow-up tasks for requested enrollments.	Salesforce Flow / Email Alert	Done	0.5
7		Provides reports and dashboards for student status, enrollments by	Reports & Dashboards	Done	0.75

	Reports & Dashboards	course, pending approvals, and revenue tracking.			
8	Security & Access Control	Provides role-based access using profiles, permission sets, and sharing settings to protect student and enrollment data.	Security / Profiles / Permission Sets	Done	0.75

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Lightning App, Custom Tabs, Page Layouts
2	Backend / Logic	4	Enrollment Processing, Validation Rules, Approval Process, Salesforce Flows
3	Database / Storage	4	Student, Course, Instructor, and Enrollment Objects
4	API / Integration	0	No external API integration implemented
5	Security / Authentication	1	Profiles, Permission Sets, and Sharing Settings

Feature Contribution to the Solution

The implemented features work together to provide an end-to-end enrollment management solution. Student and course records are stored using Salesforce Objects, enrollment processing connects students with courses and instructors, and automation reduces manual work. Validation Rules and Approval Processes improve data accuracy and control enrollment processing. Reports and Dashboards provide visibility into academic operations, while security controls ensure appropriate access to information.

The project documentation specifically identifies student management, course management, enrollment processing, instructor assignment, and reporting as core functional requirements.
