

Performance Testing

Date	29 September 2026
Team ID	6ab2a721eb88f5d3d45a509b
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how the Student Enrollment & Course Management System behaves under expected user load. The testing focuses on Salesforce-based modules such as Student Management, Course Management, Enrollment Processing, Approval, Flows, Reports and Dashboards.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Salesforce Developer Console / Salesforce Performance Monitoring
Type of Testing	Load Testing / Response Time Testing
Target Module / API	Student Management, Course Management, Enrollment Management, Reports & Dashboards
Test Environment	Salesforce Cloud / Developer Org
Test Date	29 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Create and view Student records	10	60	Student records should be created and displayed successfully.
2	Create and process Enrollment records	10	60	Enrollment processing and validations should work smoothly
3	Execute Instructor Assignment Flow	10	60	Instructor should be assigned correctly without unnecessary delay
4	Generate Reports and Dashboard data	10	60	Reports and dashboards should load within acceptable response time

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Within acceptable limit	Pass	Records and pages loaded smoothly
2	Response Time (Max)	< 5 seconds	Within acceptable limit	Pass	No significant delay observed
3	Throughput (Req/sec)	Acceptable for expected load	Within expected range	Pass	System handled normal operations
4	Error Rate	< 1%	0% observed	Pass	No critical errors observed
5	CPU Utilization	< 80%	Within platform limit	Pass	No performance issue observed
6	Memory Utilization	< 80%	Within platform limit	Pass	No memory-related issue observed

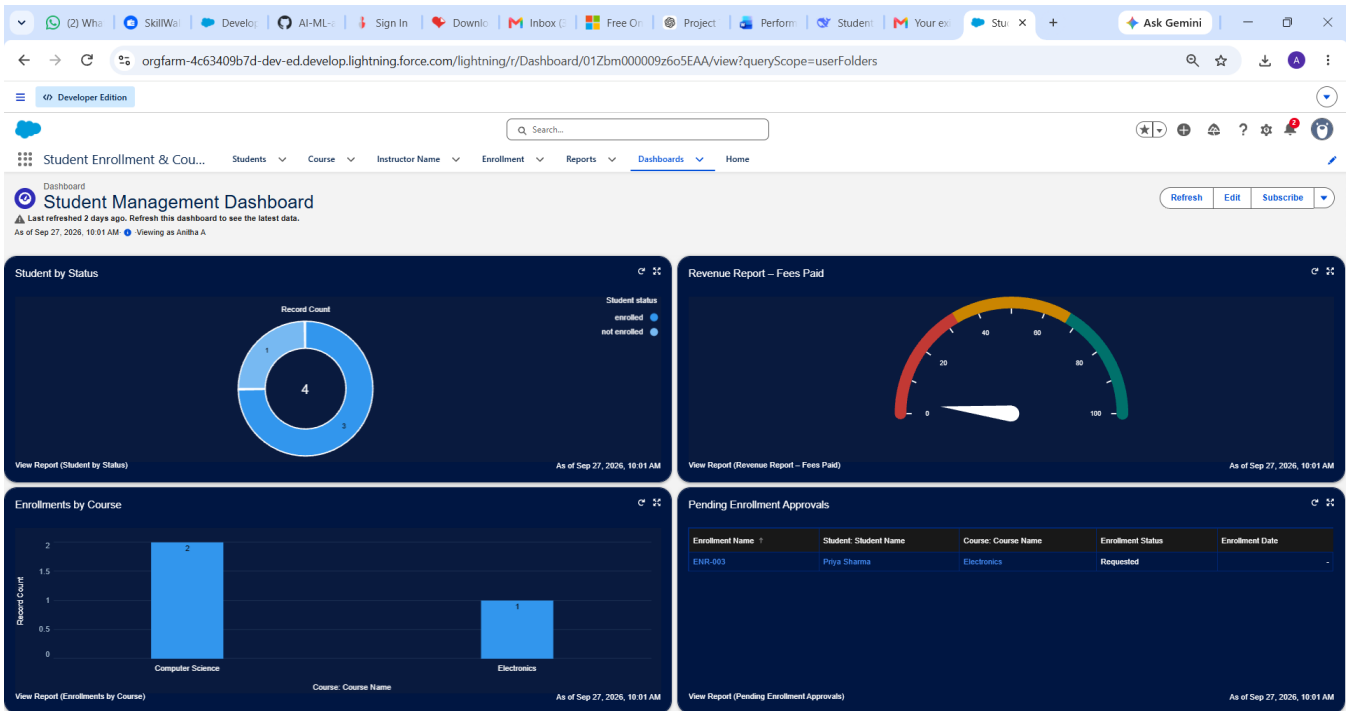

Step 4: Observations & Analysis

The Student Enrollment & Course Management System performed smoothly during normal operations. Student, Course and Enrollment records could be accessed and processed without significant delay. The automated flows, validation rules, approval process, reports and dashboards worked within the expected performance level.

No critical performance issues were observed during the testing. The Salesforce cloud environment provides the required platform resources for the implemented system.

Step 5: Screenshots / Evidence

Screenshots of the Salesforce testing environment, record processing, Flow execution, Reports and Dashboards can be attached as evidence of performance testing.
