

Technology Stack

Date	15 March 2026
Team ID	6ab2a721eb88f5d3d45a509b
Project Name	Student Enrollment & Course Management
Maximum Marks	2 Marks

Define Your Technology Stack:

Our project uses the **Salesforce Cloud Platform** to develop a centralized Student Enrollment & Course Management System. **Salesforce Lightning** is used for the user interface, **Salesforce Flows** are used for automation and business logic, and **Salesforce Objects** are used to store student, course, instructor, and enrollment data. **Validation Rules and Approval Processes** help maintain accurate and controlled enrollment operations. **Reports and Dashboards** are used to monitor student and enrollment information.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	Salesforce Lightning	Provides a simple and user-friendly interface for managing students, courses and enrollments.

2	Backend / Server-Side	Salesforce Flows	Automates enrollment processing, approvals, notifications and other workflows.
3	Database / Data Storage	Salesforce Objects	Stores student, course, instructor and enrollment data in a centralized system.
4	Cloud / Hosting / Deploymen	Salesforce Cloud Platform	Provides cloud-based access, scalability and secure data management.
5	Version Control & CI/CD	Salesforce Change Sets	Helps deploy and transfer Salesforce configurations between environments.

6	Third-Party APIs / Other Tools	Salesforce Reports & Dashboards	Provides reports and visual dashboards for monitoring enrollment and student information.
